

The following photos are of laboratory equipment and safety equipment (personal protection equipment) that you may use during the course of your laboratory study of Chemistry. You should be able to correctly identify these items when they are presented in the laboratory.

Personal Protection Equipment

Laboratory Equipment

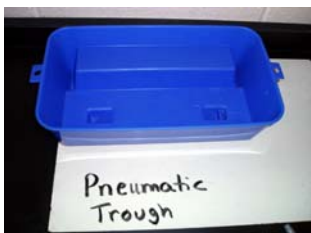

Burner

Striker

Lighter

Pneumatic
Trough

Beaker
Brush

Test Tube
Brush

Wax Marking
Pencil

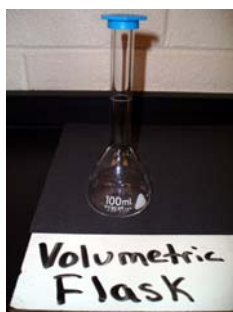

Glass tubing

Thistle Tube

Gas Generator
Bottle

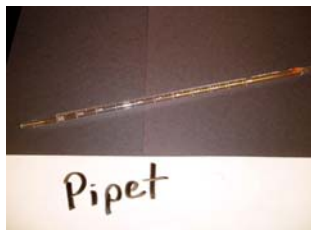

Volumetric
Flask

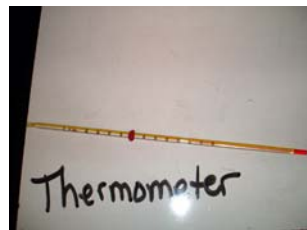

Conductivity
Tester

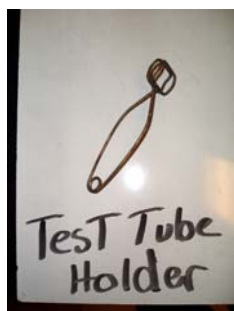

Pipet Controller

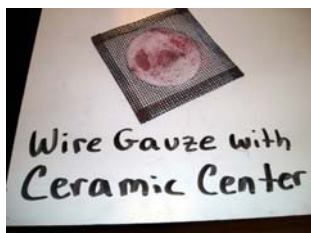

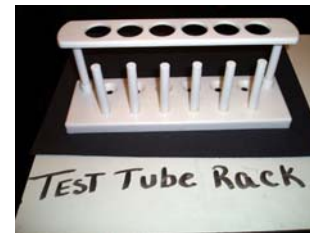

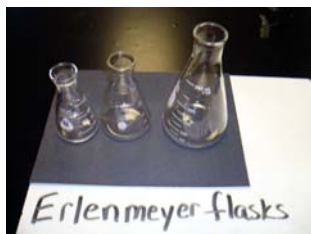

Pipet

Thermometer

The following photos are of locations in the laboratory that have to deal with the safe operation of the laboratory. You should know where each of these items or areas is located and how to use the item or area as part of safe laboratory procedures or in case of emergencies.

Material Safety Sheets

Hand wash sink

Emergency Shut Off

Fire Extinguisher
